EXPERIENCE

DRN Data | Fort Worth/Remote — **Senior UI Developer**

September 2015 - September 2017

- In charge of the AngularJS side of DRN's MEAN stack application.
- Moved all Angular logic from the controllers to services/node to follow correct patterns.
- Upgraded the entire application to Angular 1.5 and converted it to controllerAs syntax and components.
- Design and build wireframes and prototypes using a mixture of Photoshop, Invision, and Material Design for functional mockups.
- Created a development wiki for developers and documented every new directive/component that was made.
- Created multiple code styling guidelines to help facilitate clean code.
- Created a Help Documents REST API via Wordpress to better help the clients which allowed for separation of content and easier editing.
- Converted the current AngularJS application to Angular 4.
- SailsJs, MongoDB, D3, NodeJs, Material Design, underscore, grunt

Freelance | Remote — **Front-End Web Developer**

June 2011 - Present

- Led or helped out multiple companies with their web projects.
- Work varied from building new web sites, completely re-designing current sites, or various maintenance work.
- Main Technologies used: SCSS, HTML5, jQuery, Wordpress, Hubspot

Fort Worth Bike Sharing | Fort Worth — **Board Member**

May 2014 - June 2016

70kft | Dallas — **UI/UX Front-End Web Developer**

August 2014 - July 2015

- Originally a 3 week contract that was extended multiple times to about a year total.

Jira / Rally / Trello

AWARDS

2014 Fort Worth Addy Awards
Silver: Elements of Advertising – Responsive Design
Silver: Advertising Industry Self-Promotion – Digital Advertising
Silver: Digital Advertising – Websites, Consumer, Products

- Initially brought on to help build multiple AngularJS web applications for Verizon's consumer-targeted cloud services program.
- Ended up being responsible for the re-design and re-factoring of an entire responsive AngularJS web application (Verizon Cloud Marketplace).
- Completely re-structured the SASS for one application to cut down on size and redundancy (DRY Development).
- Brought all components and elements in the applications to follow along with Verizon's brand standards while avoiding excess CSS markup.
- Built multiple Angular Controllers, Directives, Services, and Routes (Both ng-router and ui-router).
- Worked closely with designers to help put out a well-designed product.
- Upgraded the applications to use Angular 1.3.5 and fixed all the issues that came along with the upgrade (ex. Dependency injection issues in 100+ files).
- Technologies used: AngularJS (1.2 - 1.3.5), NodeJs, Bower, Grunt, RequireJs, SASS/HTML5, Bootstrap UI, Gitlab, Rally/Jira/Trello, Slack, Vagrant, Wordpress, Craft CMS

Ilfusion Creative | Fort Worth — *Front-End Web Developer*

November 2012 - May 2014

- Responsible for creating custom Wordpress themes from scratch
- Taught designers, owners, and fellow developers about UI/Ux and responsive design to better help their own work.
- Maintained about 10-15 sites while building new sites for clients.
- Created and sent out mass-email campaigns for clients

Rainman | San Antonio — *Production Manager*

November 2012 - May 2014

- Handled the production of over 220 insurance web sites.

EDUCATION

Texas Tech University - Rawls College of Business Lubbock, TX

2005 - 2009

- Business Management
- Minor in Chemistry
